Merri and i purchased Brand Mechanical Services in 1996. We have been heavily involved in the local crayfishing industry since, although less so more recently since the rationalisation of the industry. We now undertake more diverse marine, mechanical and engineering work for local and overseas clients. We live on a 100 acre property north of Dongara and have horses and cattle. We have 3 children - Jessica lives in Boddington and works as an operator for Newmont Gold and has a horse stud. Edward lives in Dongara and works as an operator at Karara Iron and Jacqui has recently completed a degree in marine science and works for the WA Fishing Industry Council.

I am nominating for local government because I have always defended what is right and I have consistently had an opinion about what needs to change to improve our community.
